

ENGEL mould technology.
All-in-one solutions. Perfect design.

ENGEL
be the first.

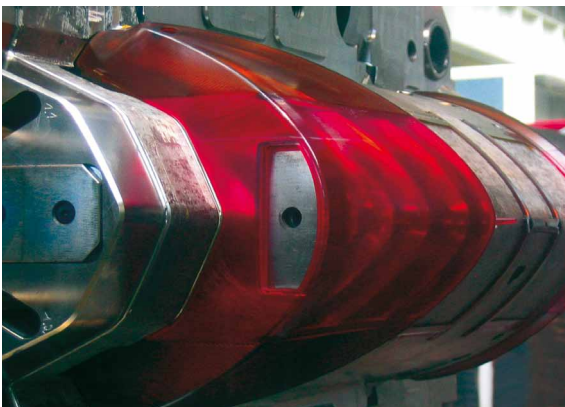

Mould meets machine. ENGEL mould technology.

> **Added productivity. Higher process stability. Higher quality.**

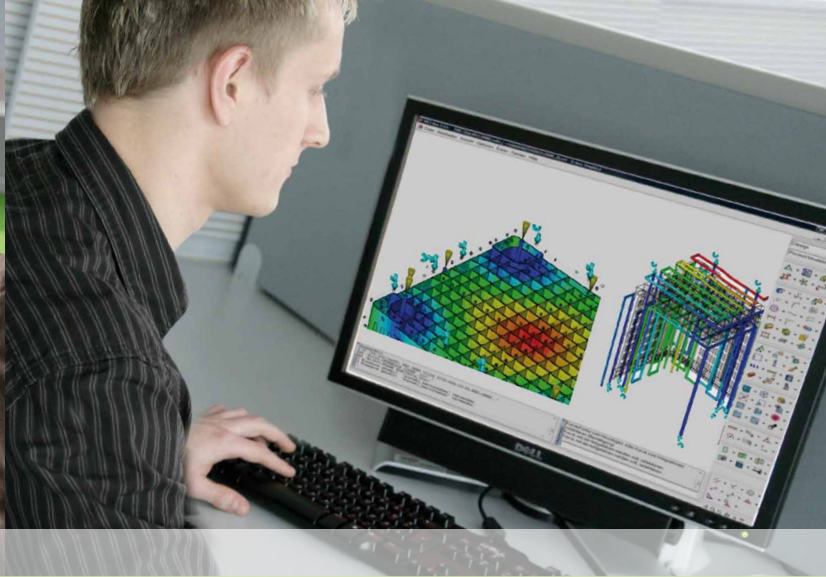

That's the result of perfect coordination between mould and machinery. Because they are planned and consistently implemented from the outset as a harmonious unit and part of an overall solution.

Trust a reliable partner to create a perfect balance between mould and machine. Trust in ENGEL. ENGEL's mould technology specialists stand for sound mould expertise. **They will be pleased to help you implement your innovations.**

- > **Are you a newcomer to plastics processing** and planning to manufacture the moulded parts you previously purchased elsewhere?
- > **Your overall system requirements are extremely complex** and – despite your own high level of injection moulding know-how – you are looking for a competent mould partner?
- > **You are planning a major project involving a large number of machines and moulds**, but have only limited internal resources?
- > **You are planning a complete turn-key project** – consisting of machine, mould, automation and peripherals?

Talk to us about it. We'll gladly support you in your projects. Competently and reliably. **ENGEL Mould Technology.**

System competence. ENGEL mould technology.

- > Mould purchase **from ENGEL**
- > Machine purchase **from ENGEL**
- > Automation **from ENGEL**
